

**HART ROOFING**

THE DIFFERENCE IS IN THE DETAILS

## Your Home is One of Your Most Important Investments.

A quality roof consists of multiple products. Understanding the products will help to make sure you choose the best roof contractor and roof system for your home.

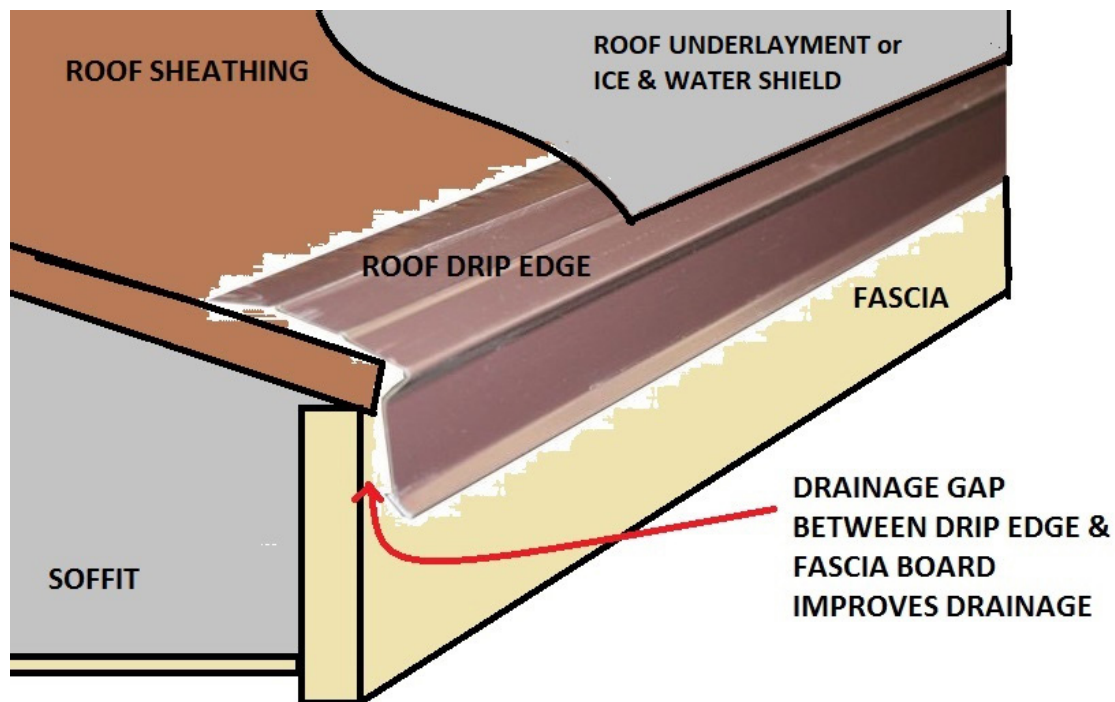

**Count on us to protect it.**

# DRIP EDGE FLASHING

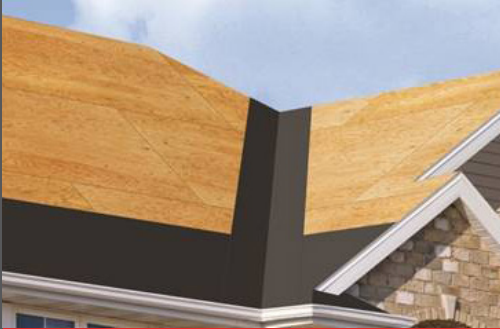

Metal sheets, usually shaped like an “L,” installed at the edge of the roof that serve a vital function by directing water away from the fascia and into the gutter.

# OFFERING PEACE OF MIND ...

**ICE AND WATER SHIELD**

A waterproof barrier used in colder climates installed at eaves edge where ice dams are most likely to form. It is also installed in valleys for extra protection where a large amount of water flows.

**UNDERLAYMENT**

A synthetic water resistant barrier installed in combination with ice and water shields.

**STARTER SHINGLES**

These are flat shingles are installed along the eaves to add a layer of protection against wind driven rain and ice.

**SHINGLES**

The next layer is comprised of your choice of Certaineed shingles.

**RIDGE VENT**

A ridge vent is a type of vent installed at the peak of a sloped roof on some homes which allows warm, humid air to escape a home /building's attic.

**RIDGE AND HIP SHINGLES**

These are specialty shingles that are used to cover ridge vents and non-vented roof ridges and hips. These shingles will match the roof shingles.

# HART ROOFING

THE DIFFERENCE IS IN THE DETAILS

---

**The HART ROOFING  
DIFFERENCE is just the  
beginning of a quality  
experience.**

Is not only found in the quality of product and workmanship we offer with even the smallest job, but in the professional way we conduct ourselves, from the first time we meet until we have meticulously cleaned up the work site and said goodbye.

*We know our  
reputation depends on  
your satisfaction long  
after we've installed  
your roof.*
